Business Under Siege

Top Threats to Your Business Continuity

While business continuity planning is essential, several threats can put your plan to the test.

Cyberattacks
Hackers can compromise systems, steal data and disrupt operations.

Natural disasters
Floods, fires or earthquakes can damage infrastructure, causing downtime.

IT and telecom outages
Disruptions to critical IT or telecom systems can even halt day-to-day operations.

Data breaches
Unauthorized access can lead to reputational damage and financial losses.

Supply chain disruptions
Interruptions to the supply chain can cause delays and impact productivity.

Human error
Employee mistakes can lead to system downtime or data loss.

Utility failures
Disruptions to essential services, such as water supply, can impact operations.

Fire and security incidents
Fire damage or physical security breaches can affect business/employee safety.

Regulatory changes
Changes in laws or regulations can impact compliance and lead to penalties.

Don't worry!
